Topic 1, Main Questions NEW

Question: 1

DRAG DROP

An engineer is troubleshooting traffic routing through the virtual router. The firewall uses multiple routing protocols, and the engineer is trying to determine routing priority. Match the default Administrative Distances for each routing protocol.

Static	Answer Area • • • •		20
OSPF External			120
EBGP			10
RIP			110

Answer:

Explanation:

Answer Area

Static	20
OSPF External	120
EBGP	10
RIP	110

Question: 2

An engineer needs to permit XML API access to a firewall for automation on a network segment that is routed through a Layer 3 subinterface on a Palo Alto Networks firewall. However this network segment cannot access the dedicated management interface due to the Security policy. Without changing the existing access to the management interface how can the engineer fulfill this

request?

- A. Enable HTTPS in an Interface Management profile on the subinterface
- B. Add the network segment's IP range to the Permitted IP Addresses list
- C. Specify the subinterface as a management interface in Setup > Device > Interfaces
- D. Configure a service route for HTTP to use the subinterface

Answer: A

Explanation:

Question: 3

A Panorama administrator configures a new zone and uses the zone in a new Security policy. After the administrator commits the configuration to Panorama, which device-group commit push operation should the administrator use to ensure that the push is successful?

- A. force template values
- B. merge with candidate config
- C. specify the template as a reference template
- D. include device and network templates

Answer: D

Explanation:

Question: 4

An administrator cannot see any Traffic logs from the Palo Alto Networks NGFW in Panorama reports. The configuration problem seems to be on the firewall. Which settings if configured incorrectly most likely would stop only Traffic logs from being sent from the NGFW to Panorama?

A)

Panorama Settings

Panorama Servers

10.99.1.21

Enable pushing device monitoring data to Panorama

Receive Timeout for Connection to Panorama (sec) 240

Send Timeout for Connection to Panorama (sec) 240

Retry Count for SSL Send to Panorama 25

Enable automated commit recovery

Number of attempts to check for Panorama connectivity 1

Interval between retries (sec) 10

Disable Panorama Policy and Objects Disable Device and Network Template OK Cancel

B)

C)

D)

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: B

Explanation:

Question: 5

A network administrator configured a site-to-site VPN tunnel where the peer device will act as initiator. None of the peer addresses are known. What can the administrator configure to establish the VPN connection?

- A. Set up certificate authentication
- B. Enable Passive Mode
- C. Use the Dynamic IP address type
- D. Configure the peer address as an FQDN

Answer: C
